## About us...

We introduce ourselves as the leading Manufacturer of Rotational moulding granules and powder.

We have achieved profound success by providing superior quality and wide range of colors with timely commitment. We have a strong infrastructural base, which is equipped with Hi-Tech labs and skilled persons.

We have highly efficient team of production, consultants and marketing.

## Product...

Prime Roto plast is an innovative company that provides the highest quality colour-compounded polymer granules and powder to rotational moulding manufacturers across the globe. Our aim is to provide a consistent aesthetic and material quality and strength, shaped around each individual client's needs and standards.

Prime Roto plast are available in different Colour like Black, Blue tone White, Milky White, Blue, Orange, Green, Yellow and other Special colour as per our Valued Customers Requirement.

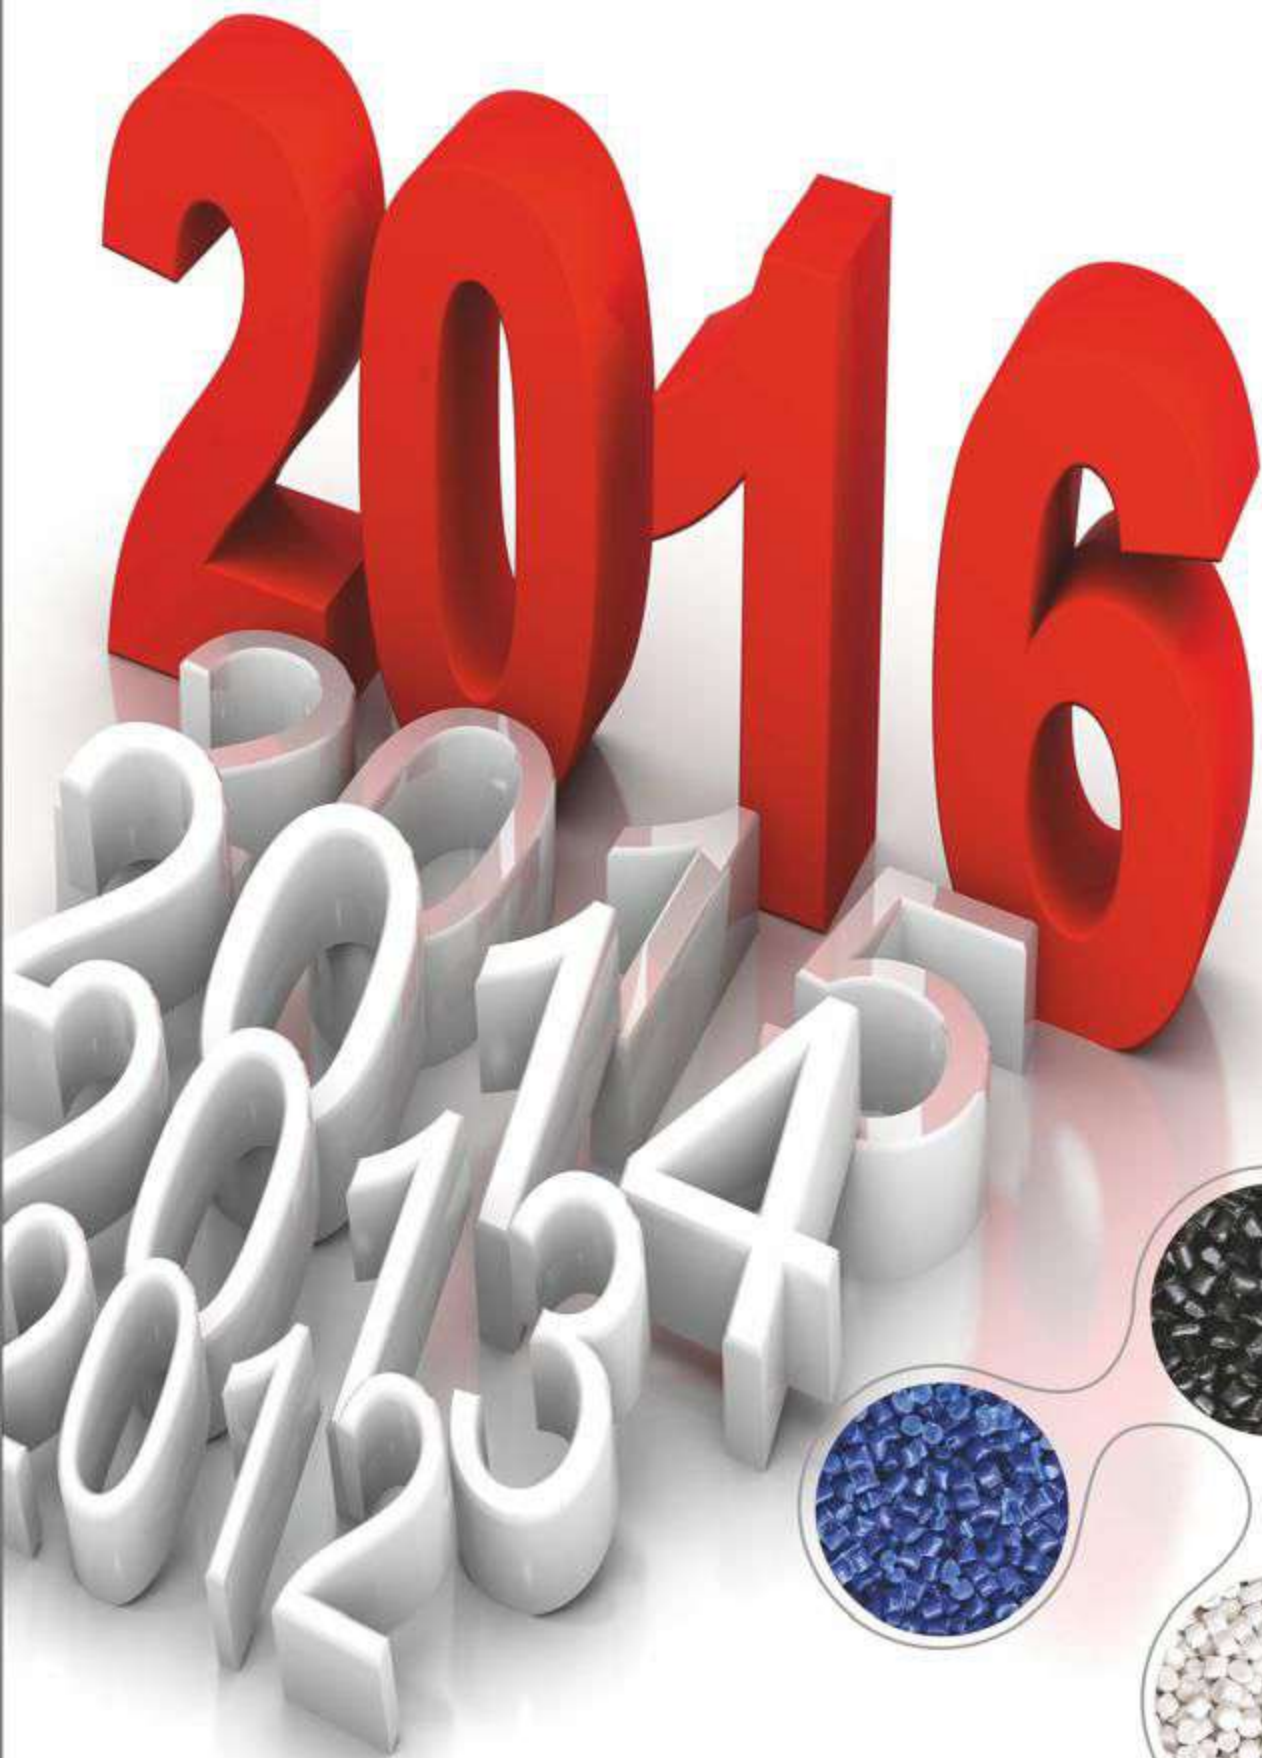

## We aim...

- To provide our clients with specialised colour roto moulding polymer granules and powder
- To satisfy our clients with the quality and availability of our material at all times.
- To fully understand the industry, business, constraints and opportunities of each of our clients.
- To grow each of our clients' respective businesses to its full potential - after all, their growth is our growth.

## Experience...

Our experience in the rotational moulding industries have added great value to the service we provide, with rotational moulding specialists and technical experts available to our clients to make sure their moulding process runs smoothly with a product finish that is aesthetically pleasing, with ultimate product strength.

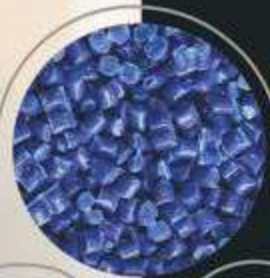

## Capacity...

As the Market leader in the rotational moulding material supply industry, we have a responsibility of satisfying our clients needs it's service that exceeds their expectations. We provide our clients with top-quality grades, but also keep the cost to a reasonable level through constant technological innovation.

We pride ourselves on being one of India's most cost-effective suppliers roto moulding granules and powder material.

## Quality...

Our colour-compounded material measures up to world leading standards, and is subject to a number of quality control checks before being shipped off. An internal lab facility is used to ensure consistency and the right specification being met on each of our products.

## Application...

Mainly our rotational moulding granules or rotational moulding powder is used for manufacturing of water storage tank and chemical tanks, pallets and material handling bins, road divider, boats, septic tanks, flower pots, feed carts, calf hutches, outdoor toys, cool boxes(Ice box), utility handling carts, and many more customized product of rotomoulding item, etc.
